Chapter IV
Financial report for the year ended 31 December 2024

A. Introduction

1. The Executive Director has the honor to submit the financial report on the accounts of the International Trade Centre (ITC) for the year ended 31 December 2024.

2. The present report is designed to be read in conjunction with the financial statements. It provides an overview of ITC's consolidated financial position and performance, highlighting key trends and significant changes. Attached to the report is an annex with supplementary information, which is required to be reported to the Board of Auditors under the Financial Regulations and Rules of the United Nations.

B. Governance

3. ITC is the joint technical cooperation agency of the United Nations and the World Trade Organization (WTO) for trade and international business development. ITC is subject to the governing bodies of both parent organizations. These include the programme and budget approval bodies of the United Nations and WTO: the Committee for Programme and Coordination (CPC), the Advisory Committee on Administrative and Budgetary Questions (ACABQ), the General Assembly, the WTO Committee on Budget, Finance and Administration (CBFA), and the WTO General Council.

4. ITC is subject to the Financial Regulations and Rules and the Staff Regulations and Staff Rules of the United Nations, and to the oversight system of the United Nations. The Executive Director of ITC is jointly selected by the WTO Director-General and the Secretary-General of the United Nations Conference on Trade and Development (UNCTAD) and appointed by the United Nations Secretary-General.

5. The ITC programme of work is reviewed annually by the Joint Advisory Group, the main intergovernmental advisory forum of ITC, which is open to members of UNCTAD and WTO. The WTO General Council and the UNCTAD Trade and Development Board review the report and recommendations of the Joint Advisory Group annually. The Group serves several key functions, including keeping member States appraised of ITC operations, enabling them to offer views and comments, advising on the ITC strategic plan, as well as announcing voluntary extra-budgetary contributions. It is also the opportunity for the heads of WTO and UNCTAD to comment on the performance of ITC.

6. The Consultative Committee of the ITC trust fund reviews the ITC strategic and operational plans and the use of funds made available through the ITC trust fund.

C. Objectives and strategies

7. ITC aims to improve the international competitiveness of micro-, small and medium-sized enterprises from developing countries, especially least developed countries, and countries with economies in transition through the delivery of trade-related technical assistance.

8. The ITC mandate is based on the principle that trade can be a powerful driver of improved livelihoods by enhancing the competitiveness of micro-, small and medium-sized enterprises. The importance of trade is explicitly recognized in the 2030 Agenda for Sustainable Development, which describes international trade as an engine for inclusive economic growth, job creation and poverty reduction.

9. Member States have committed to promoting a universal, rules-based, open, transparent, predictable, inclusive, non-discriminatory and equitable multilateral trading system under the WTO, along with meaningful trade liberalization. In this context, ITC's support for MSME competitiveness, employment creation and income generation is more vital than ever.

10. 2024 was the third year of implementation of ITC strategic plan 2022-2025. ITC continues to deliver on its mandate in support of the Sustainable Development Goals. ITC advocates for placing trade-led growth at the centre of economic and social policies of Member States, builds and strengthens business ecosystems and boosts micro-, small and medium-sized enterprise competitiveness in developing countries. The work of ITC with women, youth and persons in vulnerable situations helps to build sustainable and inclusive livelihoods through trade.

D. Overview of operations and environment

11. In line with the ITC strategic plan 2022-2025, ITC contributes to the Sustainable Development Goals, summarized as People, Planet, Prosperity supported by Peace and Partnerships ("the 5Ps"). ITC combines its extensive expertise in four core service areas: (a) improved micro-, small and medium-sized enterprise firm-level capacities to trade; (b) a more supportive business ecosystem for micro-, small and medium-sized enterprises; (c) a more conducive policy and regulatory environment for micro-, small and medium-sized enterprises and (d) improved business, trade and market intelligence (public goods) and advocacy for micro-, small and medium-sized enterprises. These efforts contribute to five impact areas: sustainable and resilient value chains, inclusive trade, green trade, e-commerce, and regional integration and South-South trade.

12. In its 2024 operational plan, ITC planned to deliver trade-related technical assistance worth $148.0 million. Actual delivery was above target, at $160.9 million. This delivery was supported by two main funding sources: the regular budget and extrabudgetary funding. ITC delivered technical assistance, capacity-building and market intelligence with gross extrabudgetary expenditures of $117.3 million. Extrabudgetary expenditure is approximately 4.7 per cent higher than in the previous year. Regular budget expenditure amounted to $43.5 million. General performance is in line with output and outcome targets that were set for the year. The Centre's performance continued to be strongly supported by corporate initiatives for innovation, efficiency and effectiveness.

13. In 2024, over 1.2 million beneficiaries became more aware of trade-related topics, through use of ITC market intelligence tools and other digital content, as well as through targeted ITC awareness-raising and knowledge sharing events. In over 23 cases, ITC influenced policymakers and contributed to strategy or policy formulations for the benefit of micro-, small and medium-sized enterprises in developing economies. In almost 480 instances, public and private business support organizations improved their performance through ITC interventions and improved their ability to serve their clients.

14. More than 58,000 micro-, small and medium-sized enterprises, of which over 26,000 were women-led businesses, changed their business operations and improved their competitiveness. Over 19,000 micro-, small and medium-sized enterprises (of which over 8,400 were women-led) transacted international business with ITC assistance. The largest share of ITC delivery – about 50 per cent - continued to focus on the sub- Saharan Africa region, in line with the Centre's prioritization of the most vulnerable countries. In 2024, 39 per cent of country specific extrabudgetary expenditure was dedicated to the least developed countries and 83 per cent to the wider group of priority countries, consisting of the least developed countries, landlocked developing countries, small island developing states, sub-

Saharan Africa and countries in conflict and post-conflict situations.

15. During 2024, ITC continued to incorporate lessons learned, including from its evaluations, and develop new approaches to optimize delivery in fragile country contexts and tackle the effects of the compound crises, post-conflict situations and socio-economic shocks and instabilities. ITC maintained a hybrid approach to delivery, delivering on-site and building digital capacity through its SME Trade Academy with country-based implementing partners and by partnering with other United Nations agencies. Among ITC public goods, the Market Analysis Tools recorded over 1.4 million registered users. ITC continued to develop the African Trade Observatory, the online portal that constitutes one of the five operational instruments of the African Continental Free Trade Area. ITC trade intelligence products, such as ITC trade briefs, raised awareness on important trade-related topics, ranging from the European Union Deforestation Regulation to the analysis of export potential of key products for the energy transition. In its flagship report, *SME Competitiveness Outlook 2023: Small Businesses in Fragility: From Survival to Growth*, ITC emphasized the need for direct support to micro-, small and medium-sized enterprises to be complemented by reforms that promote peace, stability and improve the business environment.

16. In its 2024 Annual Evaluation Synthesis Report, ITC identified new approaches to maximize impact. For example, a stronger collaboration with partner institutions is essential to sustain small and medium-sized enterprise capacity-building. Partnership approaches have fostered ownership and sustainability, and will be replicated in its capacity development work, for example, through expansion of private sector engagement, enhancing business-to-business matchmaking, and strengthening market linkages for small and medium-sized enterprises. ITC will continue improving its coordination with the United Nations Resident Coordinator system, and adapting to donor funding decentralization, by deepening country-level presence in line with its country engagement strategy.

17. During 2024, the Executive Director promulgated an updated enterprise risk management framework and policy. ITC management carried out regular corporate risk assessments, encouraging risk dialogues at all organizational levels, and sharing its risk profile with stakeholders through regular reporting. ITC identified rising risks in funding across all budgets, ongoing operational risks in staff safety and security, and a high risk of cyber threats, now compounded by growing concerns about AI misuse. ITC is committed to maintaining, improving or developing new mitigation measures in these risk areas.

18. ITC implemented several efficiency and effectiveness initiatives measured by key performance indicators. Once again, carbon emission neutrality has been achieved. In the area of staff diversity, the percentage of women on senior positions reached 48 per cent against a 50 per cent target. The UNSWAP 2.0 framework compliance rating remained at 94 per cent as measured by the indicators “met” or “exceeded”. ITC was successful in its fundraising efforts, securing $375 million of extrabudgetary funding for the years 2025 and beyond.

19. The Centre continued to work closely with UNCTAD, in areas like e-commerce and trade facilitation portals, and with the WTO, by jointly launching the Women Exporters in Digital Economy Fund, aiming to fundraise $50 million for women-led businesses, by building capacity of developing countries to engage effectively in the investment facilitation negotiations, and by supporting WTO accessions of several countries. ITC engaged with other United Nations agencies, including through membership in the United Nations Sustainable Development Group and United Nations country teams. ITC is a signatory of 51 United Nations Sustainable Development Cooperation Frameworks and has contributed to many country-level joint workplans. WTO, UNCTAD, and ITC continued to offer

universally available global public goods for trade intelligence, for example, the SDG Trade Monitor and the Global Trade Helpdesk portal.

20. At the fifty-eighth annual meeting of the ITC Joint-Advisory Group, convened in Geneva on 25 June 2024, Member States showed appreciation for the Centre's role in fostering sustainable and inclusive growth, facilitating multilateral cooperation and providing multi-faceted support to small businesses that compete in global markets. They recognized ITC support for micro-, small and medium-sized enterprises in developing countries as crucial for job creation, economic growth and poverty reduction. The Member States referenced projects and programmes such as SheTrades, Global Trade Helpdesk, Global Climate Competitiveness project and the Alliances for Action, also highlighting the Arise Plus, UK Trade Partnerships Programme, Trade Facilitation projects in Jordan and Sri Lanka, Ready4Trade Central Asia, SME Competitiveness Outlook, Youth Startup Academy and the Netherlands Trust Fund V programme. The delegations highlighted the Centre's role as crucial for least developed countries and landlocked developing countries and encouraged ITC to work towards its ambitious delivery target in least developed countries. Finally, in the context of ongoing conflicts and crises, the increasing role of ITC in promoting inclusive growth with regards to its beneficiaries – women, youth and refugee populations, was emphasized. ITC advocacy for integration of the perspectives of small businesses in global events, such as the 13th WTO Ministerial, the 4th International Conference on SIDS and other events, was equally welcomed. ITC was encouraged to continue collaboration with UNCTAD, WTO and the World Intellectual Property Organization (WIPO).

E. Overview of the financial statements for the year ended 31 December 2024

21. Statements I to V show the financial results of ITC's activities and its financial position as at 31 December 2024. The notes to the financial statements explain Centre's accounting and financial reporting policies and provide additional information on the individual amounts contained in the statements.

Revenue

Financial results

(Thousands of United States dollars)

	2024	*2023*
Total revenue	177 673	159 525
Total expense	172 302	158 784
Surplus	**5 371**	**741**

22. The financial statements for the year 2024 reflect a total revenue of $177.673 million, representing a 11.4 per cent increase from $159.525 million recorded in 2023. The largest portion of revenue, 67.8 per cent, came from voluntary contributions from donors amounting to $120.511 million. This includes a rental subsidy (contribution in-kind) of $3.242 million for the year, representing the difference between the market value and the actual amount paid for the rental of the building occupied by ITC.

23. Assessed contributions accounted for 24.3 per cent of total revenue, reaching $43.254 million, which represents an increase of 7.3 per cent from $40.326 in 2023, reflecting sustained participation of the UN and WTO. The United Nations and the WTO approved an inflation adjustment to ITC's 2024 regular budget. This increase, combined with a favourable USD/CHF exchange rate throughout the year, is the reason for the

increase in assessed contributions. Investment revenue grew by 14.2 per cent rising to $6.685 million from $5.854 in 2023. This revenue stream contributed 3.8 per cent of the total revenue for the year. Revenue from other transfers and allocations also increased from $3.145 million in 2023 to $5.871 million in 2024. This component accounted for 3.3 per cent of total revenue. Other revenue declined from $2.102 million in 2023 to $1.352 million in 2024 comprising 0.8 per cent of the total revenue.

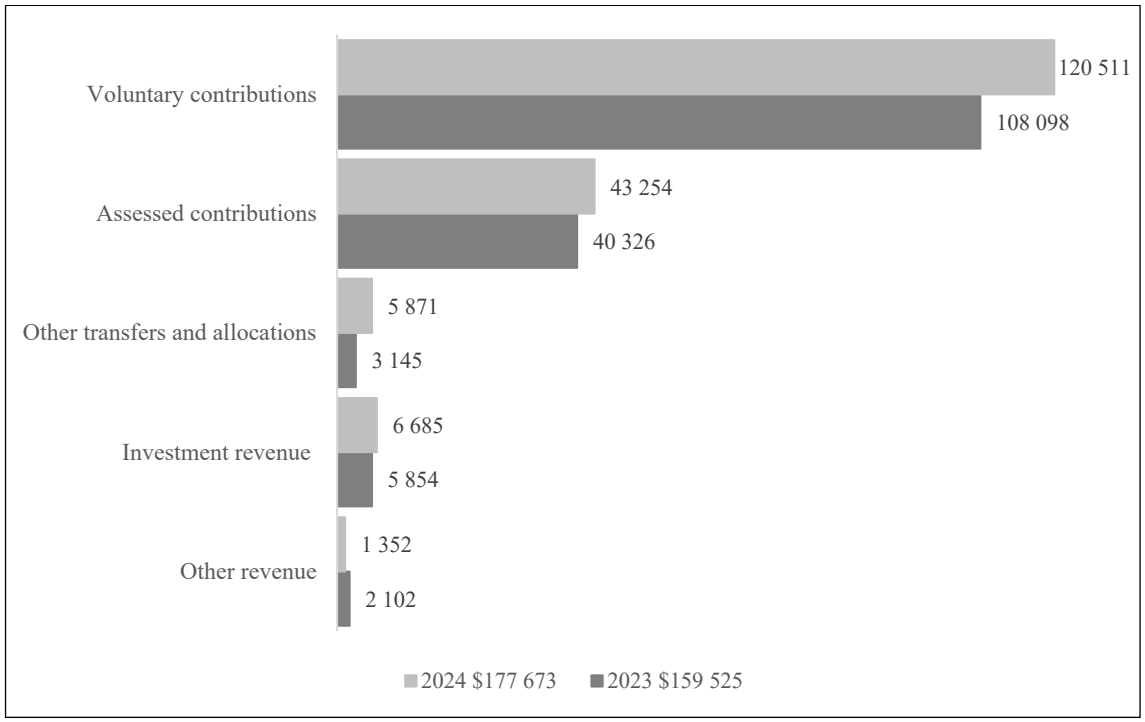

24. The overall growth in revenue is primarily attributed to higher voluntary and assessed contributions, as well as improved investment returns and transfers. The decline in other revenue was offset by these gains.

25. Voluntary contributions through donor agreements are recognized as revenue at the point of signature except where such agreements contain a condition requiring specific performance and return obligation. Voluntary contributions often cover multi-year periods as they are usually committed for the lifetime of the projects, typically three or four years. This means that part of the revenue recognized in previous years is used for activities in the current year or in future years except where the agreements are conditional.

26. In 2024, ITC continued diversifying its donor base. Contributions from unconditional agreements of $55.902 million were mainly from the signature of major multi-year agreements with Republic of China, Republic of Korea, the Netherlands, Spain, United Arab Emirates, United Kingdom of Great Britain and Northern Ireland, and United States of America (see Note 22 to the financial statements), as well as other transfers and allocations from inter-organizational arrangements and multi-donor initiatives under the Enhanced Integrated Framework Trust Fund and the United Nations multi-partner trust funds. During the year, an amount of $67.760 million was recognized from conditional agreements.

Figure IV. I
Total revenue by category and fiscal year

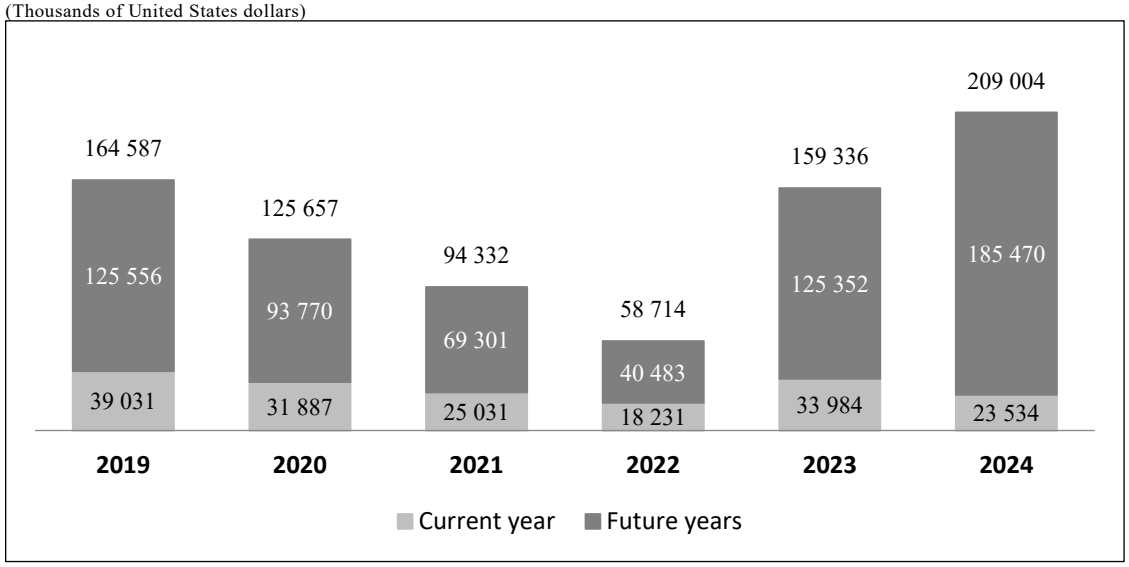

(Thousands of United States dollars)

27. Voluntary contributions to ITC in 2024 reached a record high of $209.004 million, as shown in figure IV.II below. Overall, on a year-to-year basis, this represents 31.2 per cent increase compared to 2023.

Figure IV.II
Voluntary contribution and other transfers and allocations agreements signed with donors (conditional and unconditional) showing current year and future year portions by fiscal year

(Thousands of United States dollars)

Expenses

28. Total expenses reached $172.302 million for the year ended 31 December 2024 marking an 8.5 per cent increase from $158.784 million in 2023. The general performance is in line with outcome targets that were set for the year 2024. The largest expense categories were employee salaries, non-employee compensation, and other operating expenses, collectively amounting to 82.3 per cent of total expenses.

29. Staff costs increased by 7.7 per cent to $86.042 million representing 49.9 per cent of total expenses. They included $6.122 million (2023: $5.870 million) of interest costs and current service costs related to defined benefit obligations, net of benefit payments (after-service health insurance, annual leave and repatriation grant/travel). Non-employee compensation and allowances decreased by 6.7 per cent to $28.235 million (16.4 per cent of total expenses). The decline in non-employee compensation and allowances indicates a shift towards staff for key activities. Total personnel cost, which includes staff costs and non-employee compensation and allowances, totaled $114.277 million (2023: $110.165 million); this amount represents 66.3 per cent of total expenses for the year, which is comparable to 69.4 per cent in 2023.

30. Other operating expenses totaled $27.456 million (2023: $25.001 million), representing 15.9 per cent of total expense for the year. The increase of 9.8 per cent compared to prior year is due to higher contracted services related to the facilities and communications and IT.

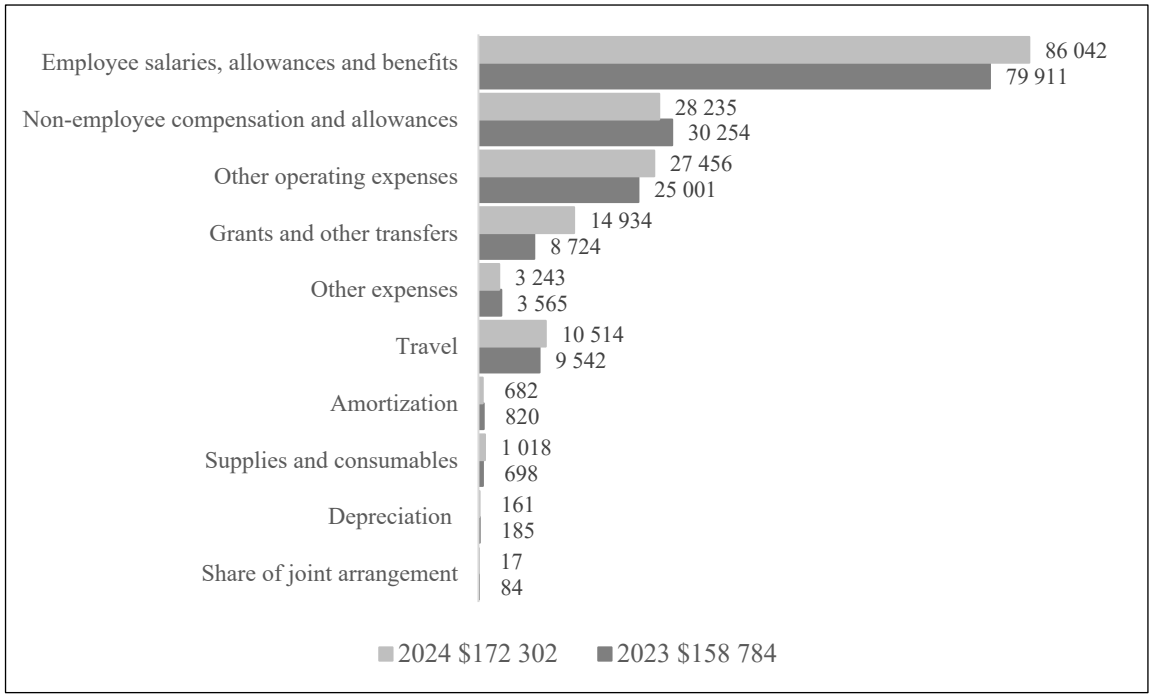

31. Grants and other transfers represent 8.7 per cent of total expenses. They increased by 71.2 percent to $14.934 million in 2024 (2023: $8.724 million) due to increased decentralization of project activities to local counterparts. Travel totaled $10.514 million (2023: $9.542 million) which represents 6.1 per cent of total 2024 expenses. The increase

of 10.2 per cent compared with 2023 travel is in line with the overall increase in expenses due to continued and expanded project implementation and interactions with the beneficiaries.

32. The remaining expenses comprise of other expenses, including share of joint arrangement, supplies and consumables, and depreciation and amortization. Other expenses and share of joint arrangements of $3.260 million (1.9 per cent) decreased 10.7 per cent compared to $3.649 million in 2023 due to the decrease in dollar value of the rent subsidy which is denominated in Swiss francs. Supplies and consumables increased 45.8 per cent compared with 2023 (2024: $1.018 million, 2023: $0.698 million) due to natural consumption. Depreciation and amortization decreased 16.1 per cent compared with 2023 (2024: $0.843 million, 2023: $1.005 million).

Figure IV.III
Total expenses by category and fiscal year

(Thousands of United States dollars)

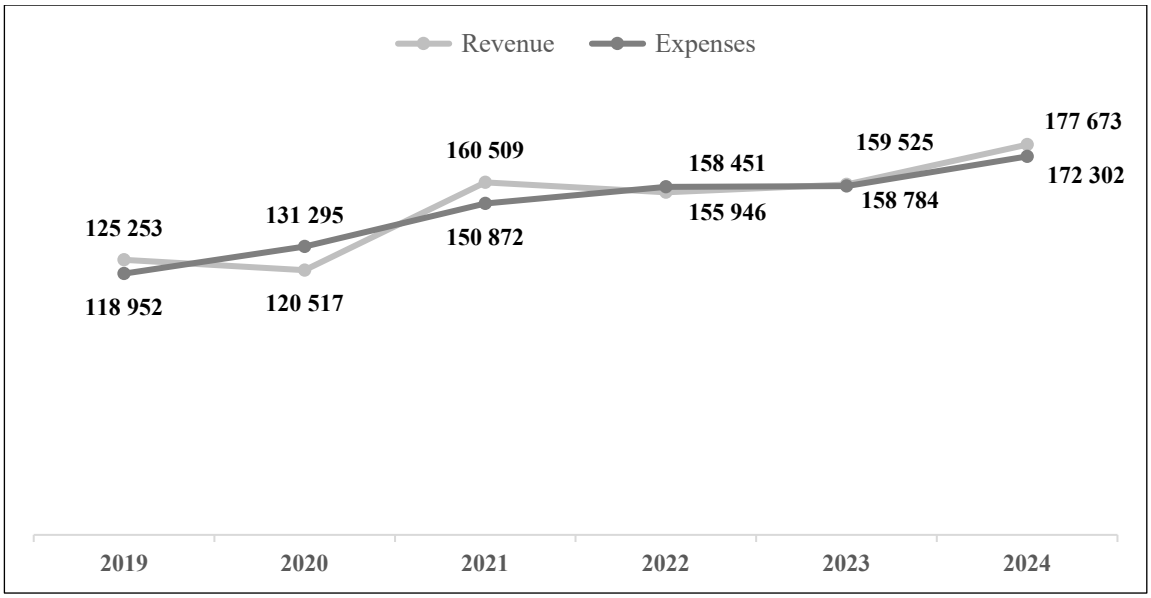

Operating results

33. The Centre maintained a positive net result, with revenue exceeding expenses by $5.371 million in 2024 (2023: $0.741 million). Growth in voluntary contributions strengthened the Centre's financial position, enabling expanded programmatic activities, in line with strategic priorities. Revenue from voluntary contributions related to agreements that contain a condition requiring the return of the contribution if funds are not spent in accordance with the terms and conditions specified by the donor, are recognized as a liability. As ITC satisfies the agreement conditions, the carrying amount of the liability is reduced and an equal amount is recognized as revenue.

34. Revenue from unconditional agreements is recognized at the time of signing, which may result in revenue being recorded several years before related expenses are incurred. Anticipated changes in accounting standards effective 1 January 2026, (IPSAS 47 (Revenue) replacing IPSAS 23 and IPSAS 9), will change the impact of upfront revenue recognition from the Centre's financial performance in future years.

Figure IV.IV
Movement in revenue and expenses

(Thousands of United States dollars)

Assets

35. As of the end of 2024, the Centre's total assets increased to $461.967 million, reflecting a 23.5 per cent growth from $374.096 million in 2023.

36. The main assets as at 31 December 2024 were cash and cash equivalents and investments totaling $170.969 million (2023: $159.523 million), representing 37.0 per cent of the total assets, and voluntary contributions receivable from donors for technical cooperation projects of $274.865 million (2023: $198.867 million), or 59.5 per cent. The remaining assets consisted of other assets, property, plant and equipment and intangible assets.

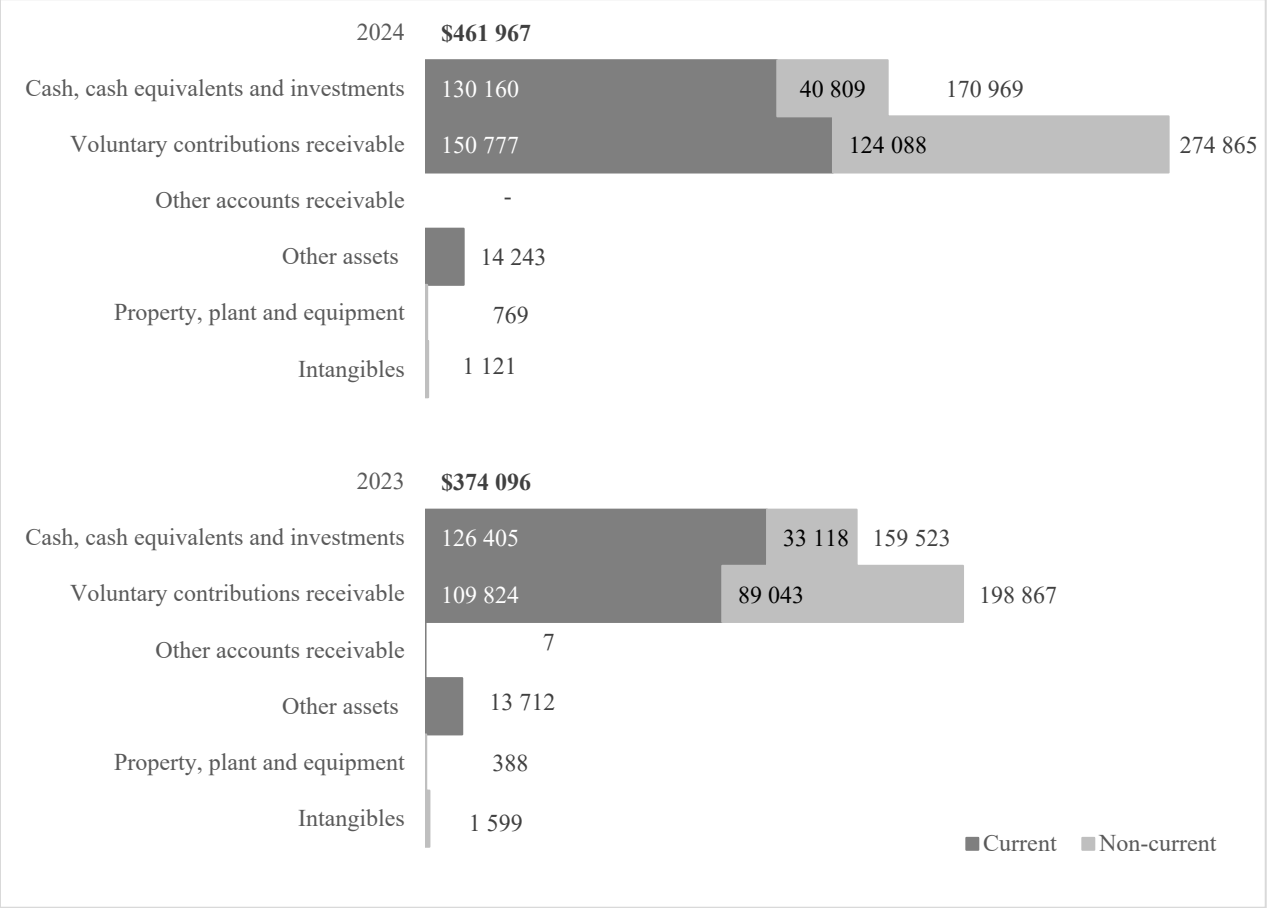

37. Cash and cash equivalents and investments of $170.969 million as at 31 December 2024 are held in the United Nations cash pool and cash held in the main and field offices. This represents an increase of 7.2 per cent over the balance held at the end of 2023, reflecting improved liquidity and cash flow management primarily because of the increase in signed agreements and receipt of instalments. In 2024, newly signed multi-year agreements for voluntary contributions amounted to $209.004 million (2023:

$159.336 million).

38. Under IPSAS, accounts receivable from voluntary contributions may be recognized in full on signature of an agreement, including amounts due in future financial periods. Of the total of $274.865 million due as at 31 December 2024, $150.777 million is expected to be received in 2025 and the balance of $124.088 million is expected after 2025.

39. Overall, voluntary contributions receivable increased by $75.998 million or 38.2 per cent over the prior year. As noted in the figure below, short-term voluntary contributions receivable increased from $109.824 million to $150.777 million and long-term voluntary contributions receivable increased from $89.043 million to $124.088 million. The change indicates a strong funding commitment from donors, which is also evident from Figure IV.II that illustrates the increase in the level of signed agreements.

Figure IV.V
Summary of assets by fiscal year
(Thousands of United States dollars)

Liabilities

40. Total liabilities grew to $485.411 million as at 31 December 2024 compared with $386.739 million as at 31 December 2023. The overall increase of 25.5 per cent is largely

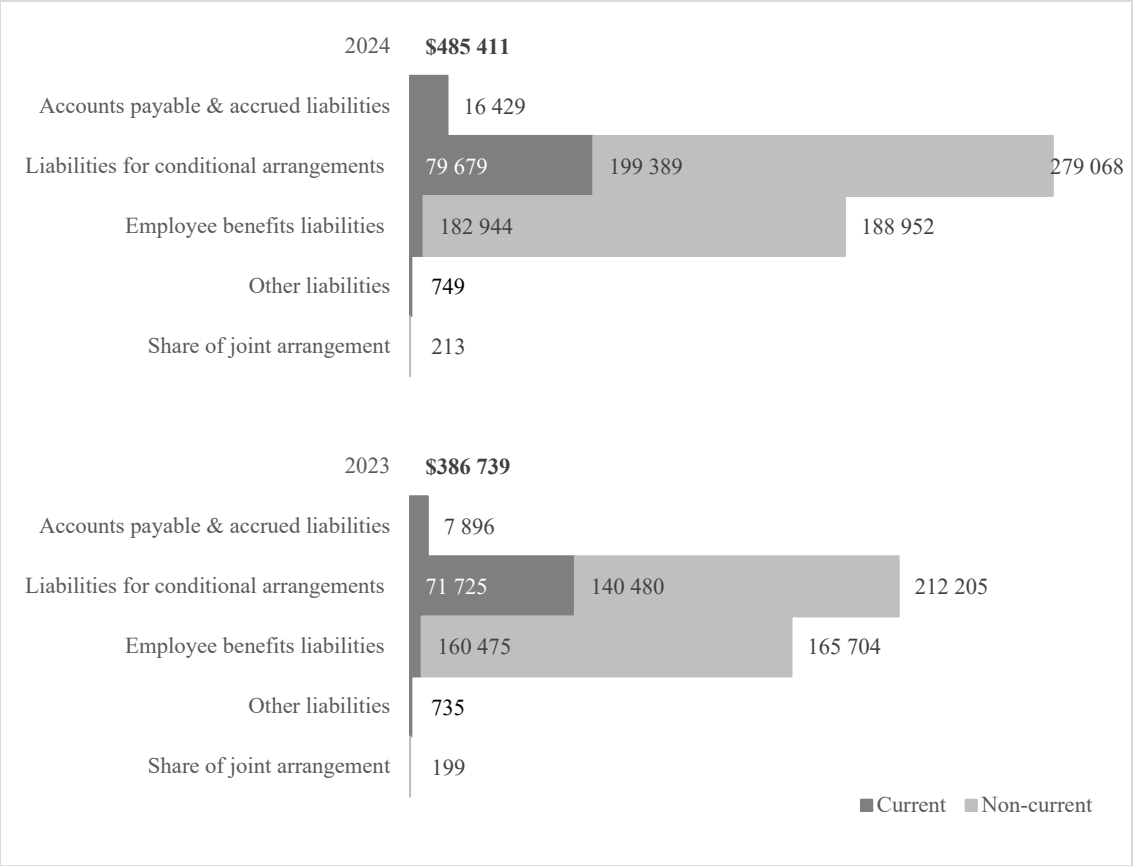

due to the increases in liabilities for conditional arrangements and employee benefit liabilities.

41. Liabilities for conditional arrangements were at $279.068 million in 2024 (2023: $212.205 million), representing a net increase of $66.863 million (31.5 per cent), and 57.5 per cent of the ITC's total liabilities in 2024. Liabilities for conditional arrangements represent the portion of the contribution, mainly from the European Union, which has not been recognized as revenue since the related services have not yet been delivered by ITC as at 31 December 2024. Approximately $153.854 million (2023: $109.016 million) in new multi-year conditional agreements were signed during the year, while approximately $67.760 million (2023: $59.692 million) were delivered and recognized as revenue during the year.

42. Another significant liability was for employee benefits earned by staff members and retirees. It accounted for $188.952 million, representing 38.9 per cent of the ITC's total liabilities in 2024. This liability is fully explained in note 12 to the financial statements, however, its primary component is a liability for after-service health insurance of $173.269 million, or 91.7 per cent of the total employee benefit liability. The increase of employee benefits liabilities by $23.248 million (14.0 per cent) is a result of actuarial valuation of long-term employee entitlements and comprises of a $16.471 million net actuarial loss, recognized directly through net assets, and $6.122 million in current service costs and interest, net of benefit payments, recognized in the statement of financial performance as a component of staff costs, as well as increase in accrued salaries, allowances and benefits and home leave by $0.655 million.

Figure IV.VI
Summary of liabilities by fiscal year

(Thousands of United States dollars)

Net liabilities

43. The movement in net liabilities during the year, reflects an increase of $10.801 million from $12.643 million in 2023 to $23.444 million in 2024. This is mainly attributable to the following: (a) the net loss in actuarial valuation of $16.471 million, (b) net surplus for the year of $5.371 million, (c) ITC participates in jointly financed operations relating to safety and security, which is established under a binding agreement; ITC reported $0.003 million in the net liabilities as its 2024 total share of the joint arrangement accounted for using the equity method, and (d) the fair value changes in investments recognized directly in net assets of $0.296 million. Operating reserves, which are part of net assets, increased from $19.776 million in 2023 to $25.569 million in 2024.

Liquidity position

44. As at 31 December 2024, the liquidity position of ITC was healthy. Despite the rise in liabilities, the increase in assets suggests the Centre remains financially stable, with strong funding commitments and liquidity. The growth in cash reserves and receivables supports operational sustainability, while the rise in liabilities for conditional arrangements reflects expanding program commitments.

45. The ratio of liquid assets to current liabilities measures the Centre’s ability to cover short-term liabilities with short term liquid resources. A ratio of 2.7 indicates a strong liquidity position, meaning the Centre has nearly three times more liquid assets than short-term liabilities. This indicates a low risk of liquidity shortfalls in the near term. When accounts receivable are excluded from the analysis, the coverage of current obligations is at 1.3, which indicates that ITC can still cover current liabilities when

relying on its assets that can be liquidated quickly, such as cash and cash equivalents and short-term investment. Liquid assets totaled $280.937 million (cash and cash equivalents of $20.550 million, short-term investments of $109.610 million and accounts receivable of $150.777 million), whereas total current liabilities amounted to $102.865 million and total liabilities amounted to $485.411 million. As at 31 December 2024, ITC liquid assets were 60.8 per cent of its total assets and it held sufficient cash and cash equivalents and short-term investments to cover its estimated average monthly expenses of $14.288 million for 9 months.

46. The table below summarizes key liquidity indicators for the financial year ended 31 December 2024, with comparatives for the year ended 31 December 2023.

Liquidity indicator	*2024*	*2023*
Ratio of liquid assets to current liabilities	2.7:1	2.8:1
Ratio of liquid assets less accounts receivable to current liabilities	1.3:1	1.5:1
Ratio of liquid assets to total assets	0.6:1	0.6:1
Average months of liquid assets less accounts receivable on hand	9.1	9.6

47. As at the reporting date, ITC had employee benefits liabilities of $188.952 million. Total cash and investment resources of $170.969 million represent 90.5 per cent of the employee benefits liabilities although the liabilities are not expected to be covered immediately. Defined benefit liabilities pertaining to the regular budget have not been funded. The Centre accrues for repatriation grant and after-service health insurance obligations for staff funded from extrabudgetary resources and the funding position of actuarially valued liabilities as at 31 December 2024 was 38 per cent.

Budgetary comparison

48. The original budget is adopted in Swiss francs. The final budget takes into consideration the result of the changes in the exchange rate between Swiss francs and United States dollars that took place between the adoption of the original budget and the reporting date as well as the final appropriation approved by the United Nations. Budget comparison and reconciliation details have been disclosed in note 17 of the financial statements.

49. Statement V, Comparison of budget and actual amounts, compares the final budget to actual amounts calculated on the same basis as the corresponding budgetary amounts. The comparison is made only in respect of the publicly available regular budget.

50. Pursuant to IPSAS 24: Presentation of budget information in financial statements, material differences between the final budget and actual expenses that are greater than 10 per cent should be explained. There was no material variance between the final budget and actual expenses at the end of 2024 except for the variance of 18 per cent in other revenue of $0.269 million. The increase is attributable mainly to bank interest income resulting from the higher interest rate environment and favourable CHF/USD exchange rate.

F. Risk and uncertainty

51. The external funding environment continues to evolve due to shifting global economic conditions, geopolitical developments, and changes in donor priorities. Increased competition for development funding, the decentralization of resource allocation decisions, and the emergence of new funding mechanisms remain key factors

influencing the financial landscape. While voluntary contributions have remained stable in recent years, the Centre continues to monitor potential fluctuations in donor commitments and actively seeks to diversify revenue sources to maintain financial sustainability.

52. In 2024, ITC experienced an increase in signed agreements for voluntary contributions, which amounted to $209.004 million compared to $159.336 million in 2023. While this represents a record level, the Centre maintains prudent financial management practices to mitigate uncertainties related to donor funding and remains committed to ensuring the continued delivery of its mandate.

53. Employee benefit liabilities continue to represent a significant proportion of the Centre's total obligations. They accounted for $188.952 million or 38.9 per cent of the ITC's total liabilities in 2024. The Centre continues to apply a set of financial and operational measures to manage these long-term liabilities, including prudent reserves management and ongoing monitoring of actuarial trends. Given the evolving nature of financial commitments, the Centre remains focused on ensuring the long-term sustainability of its financial position while adapting to external economic conditions.

Annex

Supplementary information

1. The present annex includes the information the Executive Director is required to report.

Write-off of losses of cash and receivables

2. Pursuant to financial rule 106.7 (a), an amount of non-recoverable receivables equivalent to $0.014 million was written off during 2024.

Write-off of losses of property

3. Pursuant to financial rule 106.7 (a), property, plant and equipment comprising of eleven items in vehicles category, with a total acquisition cost of $0.126 million (net-book value $0.031 million), were written-off due to their donation at the end of a project.

Cases of fraud or presumptive fraud

4. In 2024, ITC identified a fraud case involving phishing and scam payment, which included registration of fraudulent banking detail, amounting to $0.080 million.

Ex gratia payments

5. There were no ex-gratia payments during 2024.
