Vienna Convention for the Protection of the Ozone Layer

Montreal Protocol on Substances that Deplete the Ozone Layer

Thirteenth meeting of the Conference of the Parties to the Vienna Convention for the Protection of the Ozone Layer
Bangkok, 28 October–1 November 2024
Item 3 of the provisional agenda for the preparatory segment*

Financial reports and budgets of the trust funds for the Vienna Convention and the Montreal Protocol

Thirty-Sixth Meeting of the Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer
Bangkok, 28 October–1 November 2024
Item 3 of the provisional agenda for the preparatory segment*

Financial reports and budgets of the trust funds for the Vienna Convention and the Montreal Protocol

Financial report for the trust funds for the Vienna Convention for the Protection of Ozone Layer and the Montreal Protocol on Substances that Deplete the Ozone Layer for the fiscal year 2023

Note by the Secretariat

I. Introduction

1. The present note consolidates the financial information pertaining to the fiscal year 2023 as follows:

(a) Section II presents the certified financial statements for the trust funds for the Vienna Convention for the Protection of the Ozone Layer and the Montreal Protocol on Substances that Deplete the Ozone Layer and provides information on the cash balance, reserves and fund balance for both trust funds.

(b) Section III presents the certified financial statements for earmarked contributions that support the activities of the Ozone Secretariat funded by the Trust Fund for the Montreal Protocol.

(c) Section IV provides an overview of the budget performance report for the two trust funds.

2. The note should be read in conjunction with the note by the Secretariat on the proposed budgets for the triennium 2025–2027 of the Trust Fund for the Vienna Convention (UNEP/OzL.Conv.13/4), the note by the Secretariat on the proposed budgets for 2025 and 2026 of the Trust Fund for the Montreal Protocol (UNEP/OzL.Pro.36/4) and the indicative financial report on the two trust funds for the fiscal year 2024 as at 30 April 2024 (UNEP/OzL.Pro.WG.1/46/INF/1).

3. The terms of reference of both trust funds require the Executive Director of the United Nations Environment Programme (UNEP) to submit to the parties the financial report and audited financial statements for the Fund of the United Nations Environment Programme for the year in question. The

* UNEP/OzL.Conv.13/1–UNEP/OzL.Pro.36/1.

financial report, the audited financial statements and the report of the Board of Auditors for the year ended 31 December 2022 are available at www.un.org/en/auditors/board/auditors-reports.shtml (see document A/78/5/Add.7). The equivalent document for the year ended 31 December 2023 will be available via the same link in late 2024.

4. In both the text and the tables of the present report, all references to dollars ($) are to United States dollars, unless otherwise stated.

II. Certified financial statements for the trust funds

5. The certified financial statements for the trust funds for the Vienna Convention and the Montreal Protocol for the year ended 31 December 2023 are set out in annex I to the present note.

6. In paragraph 9 of decision XII(II)/4, the Conference of the Parties to the Vienna Convention requested the Secretariat to indicate the amounts of cash on hand in future financial reports of the trust fund, in addition to contributions that had not yet been received. The Thirty-Fifth Meeting of the Parties to the Montreal Protocol made a similar request in paragraph 12 of decision XXXV/27.

7. The Secretariat wishes to acknowledge with appreciation the efforts made by many parties to pay their contributions to both trust funds, with some paying their contributions in full.

A. Trust Fund for the Vienna Convention

8. Together, the reserves[1] and fund balance[2] totalled $2,722,475 at the end of 2023. The evolution of the reserves and fund balance over the period 2018–2023 is presented in table 1.

Table 1
Reserves and fund balance of the Trust Fund for the Vienna Convention, 2018–2023
(Thousands of United States dollars)

	2018	*2019*	*2020*	*2021*	*2022*	*2023*
Opening fund balance	1 710	1 804	1 746	2 276	2 479	2 478

Interest/misc. income	31	40	28	4	9	107
Expenses	(670)	(875)	(482)	(860)	(789)	(759)
Reserves/fund balance adjustment	-	(88)	-	73	(2)	(107)
Closing fund balance	1 804	1 746	2 276	2 479	2 478	2 500
Reserves	118	206	206	133	135	222
Fund balance and reserves	1 922	1 952	2 482	2 612	2 613	2 722

9. At the end of 2023, the cash balance in the trust fund, including the reserves, was $2,653,599, compared to a forecast of $2,366,000 (see document UNEP/OzL.Pro.35/5). The difference is explained by the movement in assets and liabilities during the year. Total contributions of $1,014,949 received in 2023 were recognized as follows: $253,278 as prior years' contributions, $726,974 as 2023 contributions and $34,697 as advance payments on 2024 contributions. As at 31 December 2023, unpaid contributions stood at $192,176, including an amount of $143,237 relating to prior years (see annex VI, sect. A).

B. Trust Fund for the Montreal Protocol

10. Together, the reserves and fund balance totalled $7,293,675 at the end of 2023. The evolution of the reserves and fund balance over the period 2018–2023 is presented in table 2.

[1] The reserves are equivalent to 15 per cent of the budget and are set aside in cash to cover final obligations in the event of closure of the fund.

[2] The fund balance is equal to total assets minus total liabilities. It includes cash, receivables, and other accrued assets and liabilities.

Table 2
Reserves and fund balance of the Trust Fund for the Montreal Protocol, 2018–2023
(Thousands of United States dollars)

	2018	*2019*	*2020*	*2021*	*2022*	*2023*
Opening fund balance	6 930	8 096	6 957	10 511	11 192	8 330
Contributions	5 547	5 327	5 322	3 743	2 598	3 170

Expenses	(4 707)	(6 686)	(1 928)	(3 070)	(5 499)	(5 510)
Reserves/fund balance adjustment	183	34	(4)	(39)	(18)	55
Closing fund balance	8 096	6 957	10 511	11 192	8 330	6 415
Reserves	832	798	802	841	859	878
Fund balance and reserves	8 928	7 755	11 313	12 033	9 189	7 293

11. At the end of 2023, the cash balance in the trust fund, including the reserves, was $7,680,661, compared to a forecast of $7,979,432 (see document UNEP/OzL.Pro.35/4). The difference is explained by the movement in assets and liabilities in 2023. Total contributions of $3,197,799 received in 2023 were recognized as follows: $137,456 as prior years' contributions, $2,573,028 as 2023 contributions and $487,315 as advance payments on 2024 contributions. As at 31 December 2023, unpaid contributions to the Trust Fund for the Montreal Protocol stood at $958,160, including an amount of $810,202 relating to prior years (see annex VI, sect. B).

III. Certified financial statements for earmarked contributions

12. Annex II to the present note sets out the certified financial statements for the year ended 31 December 2023 for earmarked contributions that support the activities of the Ozone Secretariat funded by the Trust Fund for the Montreal Protocol. The breakdown of the earmarked contributions is presented in annex III to the present note.

13. The following contributions were received during the year:

(a) $27,083 from Sweden and $10,627 from Finland towards the participation of parties operating under paragraph 1 of Article 5 of the Montreal Protocol (Article 5 parties) in meetings under the Protocol;

(b) $197,218 from the European Union as the second instalment for the project "Enhanced international cooperation on climate aspects of the Montreal Protocol: support to the work of the assessment panels of the Montreal Protocol";

(c) $88,692 from Italy to support the work of the co-chair of the Refrigeration, Air Conditioning and Heat Pumps Technical Options Committee of the Technology and Economic Assessment Panel for four years, beginning in 2023.

14. The Secretariat wishes to express its sincere gratitude to the European Union and the Governments of Finland, Italy and Sweden and to acknowledge the importance of the earmarked contributions made by those parties in 2023 in support of the activities funded by the Trust Fund for the Montreal Protocol.

IV. Budget performance report for the trust funds

15. Annex IV to the present note shows the budget performance report for the trust funds for the Vienna Convention and the Montreal Protocol as at 31 December 2023, reflecting actual expenditures and commitments against the approved budgets.

A. Trust Fund for the Vienna Convention

16. The utilization rate of 86 per cent of the approved 2023 budget is explained as follows:

(a) Employee salaries, allowances and benefits totalled $607,339, representing 90 per cent of the allocated budget. In response to paragraph 8 of decision XII(II)/4, some of the personnel costs for administrative staff were paid for using the programme support resources available during the year.

(b) Promotional activities, under the meeting costs category, cost $6,228, representing 62 per cent of the budget allocated for such activities, described in paragraph 17 (g) below and in annex V, section A.

(c) Staff travel costs of $32,628 charged against the budget of $30,000 allocated for travel on official business resulted in over-expenditure owing to an official trip in early January 2024 that had to be charged to the 2023 budget.

(d) A total of $29,873, was spent on equipment (expendable and non-expendable), rental of office premises, and operation and maintenance of equipment, consuming 57 per cent of the budget allocated to those items.

(e) A total of $10,598 was spent on office communication, freight and commemoration[3] of World Ozone Day. A foreign currency gain of $1,782 reduced the expenditure in the cost category by the same amount, bringing the recorded amount to $8,816.

B. Trust Fund for the Montreal Protocol

17. The utilization rate of 88 per cent of the approved budget resulted from the following:

(a) Employee salaries, allowances and benefits totalled $1,391,108, representing 81 per cent of the allocated budget. The lower consumption compared to the previous year stems in part from the fact that the Senior Legal Officer position remained unfilled from 30 April 2023 to the end of the year. In addition, in response to paragraph 11 of decision XXXIV/24, some of the personnel costs for administrative staff were paid for using programme support resources available during the year. As has been the practice, the costs for some staff were shared with the Trust Fund for the Vienna Convention (see para. 16 (a) above).

(b) The Secretariat spent $84,736 against a budget of $85,000 (99.7 per cent) to engage consultants for: (i) support and advice on scientific and technical issues; (ii) production of infographics and other visual products related to life-cycle-based hotspots in the air conditioning and food cold chain value chains; (iii) development of content for an intermediate-level course on international ozone regimes for the United Nations Information Portal on Multilateral Environmental Agreements (InforMEA) platform; (iv) development of brochures and the study for the next phase of life-cycle-analysis-based approaches for selected value chains in the refrigeration, cooling and heat pump sector; and (v) content development. Savings of $13,954 from the closure of obligations from the previous year reduced the expenditures by the same amount, bringing the reported amount to $70,782.

(c) Meeting costs of $1,598,479,[4] corresponding to 98 per cent of the allocated budget, were incurred for conference services, documentation, venues and catering for the following meetings: (i) the forty-fifth meeting of the Open-ended Working Group of the Parties to the Montreal Protocol; (ii) the Thirty-Fifth Meeting of the Parties; (iii) the seventieth and seventy-first meetings of the Implementation Committee under the Non-Compliance Procedure for the Montreal Protocol; and (iv) the meeting of the Bureau of the Thirty-Fourth Meeting of the Parties. The over-expenditures against the budget lines for the Implementation Committee and Bureau meetings resulted from additional meeting documentation and the provision of interpretation services for additional sessions, respectively. The expenditures reported in this cost category include communication and meeting organization costs of $29,174 for the assessment panels and their technical options committees.

(d) An amount of $1,155,584 for travel of Article 5 parties and experts corresponds to 97 per cent of the budget allocated for their participation in ozone treaties and assessment panel meetings held during the year.

(e) Expenditures of $164,158 for the travel on official business cost category represent 78 per cent of the amount allocated for staff travel. Travel by staff was for servicing of and/or participation in meetings of the Open-ended Working Group, the Executive Committee of the Multilateral Fund and regional networks and other such meetings. The holding of the Thirty-Fifth Meeting of Parties at the seat of the Secretariat meant that no travel was undertaken by Secretariat staff, which in turn reduced consumption of the allocated budget.

(f) Expenditures of $143,653 in the other operating costs category against a budget of $177,000 resulted in an 81 per cent utilization rate. Funds were spent on equipment (expendables and non-expendables), rental of office premises and utilities, and sundry items, namely, staff development, freight and communication. Also included in this cost category are the costs of media coverage of the

[3] Funds were disbursed to the Government of the Philippines for World Ozone Day celebrations in the country.

[4] Travel costs for Secretariat administrative assistants are also included in this budget line.

forty-fifth meeting of the Open-ended Working Group and the Thirty-Fifth Meeting of the Parties, as well as ad hoc translation and editing of documents not related to meetings.

(g) Annex V provides details of the activities included in the public awareness and communications cost category, grouped under: (i) public awareness; and (ii) digital presence. A total of $35,521, representing 64 per cent of the allocated budget for the category, pooled with funds from the cash balance ($32,947), the budget for promotional activities under the Vienna Convention trust fund (see subpara. 16 (b) above) and programme support resources, was spent on:

(i) Materials for the commemoration[5] of World Ozone Day collated in an extensive communications toolkit comprising a two-minute video on the year's theme, posters and social media tiles and messaging for Instagram, Twitter, LinkedIn and Facebook, including translation into the official United Nations languages;

(ii) Visual materials, including a visual concept for World Ozone Day and branding for the meetings of the ozone treaties and their respective materials, such as digital signage, web and social media styles and presentation templates, including their look and feel;

(iii) Awareness-raising materials, including features (International Day of the Girl, International Women's Day) and other interest stories, such as the 2023 end-of-year review video;

(iv) Digital enhancements, including the review and redesign of the "Greening our meetings" web page and the World Ozone Day web page to allow easy access to information; development of a new web page to showcase the environmental management system to make the meetings of the ozone treaties more sustainable; and templates to support social media communications on the work of the Protocol, the parties and other ozone stakeholders;

(v) The cover design and layout of the 2022 quadrennial assessment report of the Technology and Economic Assessment Panel and the Environmental Effects Assessment Panel;

(vi) Co-funding of the Montreal Protocol pavilion at the United Nations Climate Change Conference that took place from 30 November to 12 December 2023 in Dubai, United Arab Emirates; the funds were also used to cover the cost of a "hub" and moderator for a high-level ministerial session on cooling hosted by the Ozone Secretariat in collaboration with the Climate and Clean Air Coalition to Reduce Short-Lived Climate Pollutants and the Cool Coalition;

(vii) Hosting and maintenance of a website and web-based tools, along with enhancements of the registration system for meetings.

(h) An amount of $236,880 from the cash balance was spent on:

(i) A contract with the vendor to develop the contacts management system, which was finalized towards the end of the year; expected to be launched in 2024, the system will allow integrated management of contact information for meeting participants, for mailing and data-reporting purposes;

(ii) The communication activities reflected in subparagraph (g) above;

(iii) Conference services costs and travel of Article 5 parties for the workshops on strengthening effective implementation and enforcement of the Montreal Protocol and on energy efficiency. The workshops were held back to back with the forty-fifth meeting of the Open-ended Working Group and Thirty-Fifth Meeting of the Parties, with those two meetings absorbing the bigger share of the travel costs, resulting in a low rate of utilization of the allocated budget for the workshops. In addition, the reports for the two workshops were prepared in-house by Secretariat staff, which contributed to the savings with regard to the budget lines.

[5] Funds were disbursed to the Governments of Ecuador and Haiti for World Ozone Day celebrations in those countries.

* The purpose of the budget performance report is to compare the approved budget with the expenditures for the reporting period. The report was prepared using the modified cash basis of accounting, while the certified financial statements (annex I) were prepared using the accrual basis of accounting, in accordance with International Public Sector Accounting Standards. Differences between the total expenditures reported in annex IV and those reported in annex I are attributable to the use of the different bases of accounting.

Abbreviations: OEWG45 – forty-fifth meeting of the Open-ended Working Group of the Parties to the Montreal Protocol; MOP34 – Thirty-Fourth Meeting of the Parties to the Montreal Protocol; MOP35 – Thirty-Fifth Meeting of the Parties to the Montreal Protocol; ExMOP5 – Fifth Extraordinary Meeting of the Parties to the Montreal Protocol.

Annex V

Public awareness and digital presence

A. Communication and awareness-raising campaign

1. The 2023 communication objectives were focused on ensuring that certain web pages of the Secretariat's website were comprehensively reviewed and updated, or where necessary developed, so that they remained relevant, informative and fit for purpose overall, with improved accessibility.

2. Noting the increased importance placed on making United Nations entities' operations and activities more sustainable, the Secretariat embarked on redesigning and modernizing its "Greening our meetings" web page. The redesign is intended to provide information on the Secretariat's annual carbon emissions reporting and improve visualization of the related data.

3. In an extension of that work, a subpage was developed to highlight the Ozone Secretariat's sustainability commitments in accordance with the environmental management system adopted in 2021. Not only does the environmental management system web page report on the scoring of the annual meetings, it also provides information on how to improve the sustainability of Montreal Protocol meetings and reduce their carbon footprint.

4. Mindful of the increasing volume of assets produced for the annual World Ozone Day celebrations and in support of parties' commemorative events, it was noted that finding the assets on the World Ozone Day subpage layout required significant scrolling. The reviewed and revised web page has been designed for better asset hosting and accessibility and will be ready for World Ozone Day 2024.

5. The following other activities were conducted in 2023:

(a) ***A comprehensive menu was developed for the International Day for the Preservation of the Ozone Layer digital assets.*** The Secretariat created an extensive communications toolkit to support commemorative events planned for World Ozone Day 2023, and made it available in all six official United Nations languages. In parallel with posters, the social media pack contained numerous additional graphics, such as revolving carousels, and the proposed messaging and layout for the various social media platforms, enabling end users to create a myriad of different posts. By providing a continued and expanded portfolio of digital assets, the Secretariat hopes to have provided additional support for parties' and ozone stakeholders' online outreach efforts to increase global awareness of the ozone layer and engagement with local commemorations of International Day for the Preservation of the Ozone Layer. In addition, a video and infographics were developed on the theme "Montreal Protocol – fixing the ozone layer and reducing climate change".

(b) ***A short "Review of 2023" video was developed to replace the traditional season's greetings "card" and expand on the digital assets available for wide sharing by the parties.*** The video was posted on the Secretariat's website to highlight the important events, milestone achievements, challenges and successes of 2023.

(c) Creation of the cover page and layout design for the 2022 quadrennial assessment panel reports of the Technology and Economic Assessment Panel and the Environmental Effects Assessment Panel. The cover design and layout template used to typeset the two reports are designed to be used for future quadrennial assessment reports, to establish a consistent, professional look.

B. Digital presence and web enhancements: progress in activities since 2018

Website section or digital tool	*Description*	*Link*
Planned/under implementation/completed (2024)		
Contacts management system	The system will allow integrated management of contact information for meeting participants, for mailing and data-reporting purposes.	Work in progress
OEWG46 meeting mobile app and COP13/MOP36 meeting mobile app	The app will allow participants to access meeting information in real time during the meetings.	Work in progress
Registration system	Continuous enhancement of the system currently being used by the Secretariat to register meeting participants	Work in progress
Avoided CO2e mobile app and web page	The app allows users to obtain CO_2-equivalent amounts for ozone-depleting substances that have been phased out and for hydrofluorocarbons, the potent greenhouse gases expected to be phased down.	https://apps.apple.com/th/app/avoided-co2e/id6473017652 https://play.google.com/store/apps/details?id=org.unep.ozone.co2e https://ozone.unep.org/avoided-co2e/
World Ozone Day web page	Update look and feel and improve accessibility of World Ozone Day digital assets	Work in progress
Gender web page	Information on gender with respect to the work of the ozone treaties	Work in progress
Montreal Protocol Who's Who website	A comprehensive online directory providing detailed information on individuals	Work in progress
Completed in 2023		
Fund contributions	Designed to allow the parties to easily search and access the status of their contributions	https://ozone.unep.org/fund-contributions
OEWG45 and MOP35 meeting mobile applications	The apps allowed participants to access meeting information in real-time during the meetings.	(app links will be replaced when the new meeting app is available)
Greening our meetings	Improved visibility of the Secretariat's annual carbon emissions track record and sustainability efforts under the environmental management system, including information on accessibility of information and access to meetings for people with physical/cognitive challenges	https://ozone.unep.org/greening-our-meetings https://ozone.unep.org/ems
Completed in 2022		
Virtual exhibition for sustainable cold chains	A partnership initiative with United Nations Environment Programme OzonAction that showcases commercially available cold chain technologies and promotes game-changing and systemic approaches, relevant initiatives and not-in-kind cold-chain solutions. The platform allows submission of nominations for the virtual exhibition for review by the organizers and displays the approved technologies on the platform. The objective is to demonstrate sustainable cold chain technologies.	https://ozone.unep.org/coldchainexhibition
Educational portal – Apollo Edition	A dedicated page offering interactive resources that inspire learners and give them the chance to exercise what they have learned	https://ozone.unep.org/apollo-edition
Reset Earth	A dedicated page for Reset Earth game information and an immersive animated web series	https://ozone.unep.org/reset-earth
Reset Earth Game	A mobile game aimed at bringing hope to Generation Z by showing them what was achieved after the world came together in 1985 at the Vienna Convention to address the ozone crisis. The game is free of charge and available for both Android and iOS.	https://apps.apple.com/us/app/reset-earth/id1535965317 https://play.google.com/store/apps/details?id=com.UNEP.ResetEarth&hl=en&gl=US

Website section or digital tool	*Description*	*Link*
Earth Simulator game	A simulation game that teaches decisions and consequences of climate-related topics	https://ozone.unep.org/apollo-edition-impact-simulator
Education portal and resources	A dedicated site designed as a resource for teachers to help engage their students around the ozone layer	https://ozone.unep.org/reset-earth-education-resources https://ozone.unep.org/education-portal
Technology and Economic Assessment Panel Primer	An online compendium of questions and answers related to the TEAP	https://ozone.unep.org/teap-primer
Ozone Layer Protection	Collaboration with the World Environment Situation Room to reflect ozone-treaty-related information on the World Environment Situation Room website	https://wesr.unep.org/article/ozone-layer-protection
Completed in 2021		
Disclosure of interests	A new online platform developed for the collection, approval and posting of annual DOIs for TEAP, TOC and TSB members	Link shared with relevant members
Data centre	Additional ways of visualizing data with maps	https://ozone.unep.org/countries
Completed in 2020		
New meeting portal to replace the existing one	An improved platform for managing meetings organized by the Secretariat	https://ozone.unep.org/meetings
Online forum	A platform that enables parties to review meeting documents and provide comments in advance of the meeting	https://online.ozone.unep.org
Online reporting system – enhancements	Including implementation of new reports and updating of existing ones; improved data entry forms; support for cleansing of legacy data imported from the previous system; creation of additional public pages (e.g. resource page for unauthenticated users); party notification of upcoming reporting obligations to help parties meet submission deadlines; and Secretariat notification when the online reporting system name/email is changed	https://ors.ozone.unep.org/
Country profile app	Allows the user instant access to the data centre and the various tools while on the move, improving accessibility to crucial information and data. Free of charge and available on Android and iOS	https://apps.apple.com/us/app/ozone-data-hub/id1538608361 https://play.google.com/store/apps/details?id=org.unep.ozone.countryprofiles&hl=en
Ozone treaties and SDGs	A dedicated, more comprehensive and more informative page on the ozone treaties' impact on the Sustainable Development Goals, targeting readers looking for more in-depth analysis	https://ozone.unep.org/sdg
Ozone Secretariat homepage	A new look and feel, providing the user with an easy-to-navigate interface with the website	https://ozone.unep.org/
Ozone and you	The content was revised and updated. Additional categories and images provided greater visual impact, as well as serving to separate the different information sections	https://ozone.unep.org/ozone-and-you
Timeline	A brand-new layout and the addition of archive images for each event provided a much more visually interesting timeline	https://ozone.unep.org/ozone-timeline
What you can do	Complete revision of the layout, incorporating visuals to better highlight the information on sound cooling-appliance application and management The Secretariat will endeavour to continually update and add new content to this section	https://ozone.unep.org/what-you-can-do
Country data – data centre	This was supplemented with graphs and charts for visualization of the data.	https://ozone.unep.org/countries/data-table

Website section or digital tool	*Description*	*Link*
Mixtures/blends tool	A new tool for inputting various mixtures/blends to derive the controlled substances they contain. Visual graphics were incorporated to help illustrate data flows for groups of substances	https://ozone.unep.org/mixtures-blends-tool
Interactive table of Implementation Committee recommendations	Designed to allow the user to easily search and access the Implementation Committee decisions and recommendations since 1992	https://ozone.unep.org/list-of-implementation-committee-recommendations
Interactive table of TEAP reports requested by parties	A comprehensive list of TEAP reports expected to be produced until 2030 in response to parties' requests; the list includes a search function and filters for reporting year, type of report, topic and source decision	https://ozone.unep.org/teap-reports
Interactive table on illegal trade	Reporting by parties on illegal trade in ozone-depleting substances	https://ozone.unep.org/countries/additional-reported-information/illegal-trade
Interactive table of Protocol institution memberships	Information on Protocol institution memberships throughout the history of the ozone treaties; equipped with numerous search functions for ease of access	https://ozone.unep.org/institutions/institutions-membership
Interactive table of HFC licensing system status	Detailed information received from individual parties concerning the establishment and operation of their licensing systems	https://ozone.unep.org/additional-reported-information/licensing-systems
Completed during the period 2018–2019		
Online reporting system	Allows parties to report information online instead of using legacy submissions via email, Excel workbooks, Word documents, and PDF files	https://ors.ozone.unep.org/
Country profiles	Provides quick access to and display of information for each country, including reported data, contact details and ratification and licensing information	https://ozone.unep.org/countries
Mobile app – ozone treaties	The app allows the user instant access to the handbooks of the Montreal Protocol and Vienna Convention. Free of charge and available for both Android and iOS	https://apps.apple.com/us/app/ozone-treaties/id1482364689 https://play.google.com/store/apps/details?id=org.unep.ozone.ozontreaties&hl=en
System safety standards tool	This interactive tool presents a non-exhaustive list of international, regional and national safety standards relevant to refrigeration, air-conditioning and heat pump equipment developed by relevant standards organizations	https://ozone.unep.org/system-safety-standards
Handbooks	A web-based version of the handbooks of the Montreal Protocol and Vienna Convention, for portability and easy access anywhere, anytime	https://ozone.unep.org/treaties/montreal-protocol
Registration system	The Secretariat uses the system for registration of its meeting participants. The system's technical infrastructure environment were upgraded, new features were added and necessary improvements made.	https://ozone.kronos-events.net/

Abbreviations: COP13 – thirteenth meeting of the Conference of the Parties to the Vienna Convention; DOI – disclosure of interest; iOS – iPhone operating system; MOP35 – Thirty-Fifth Meeting of the Parties to the Montreal Protocol; MOP36 – Thirty-Sixth Meeting of the Parties; OEWG45 – forty-fifth meeting of the Open-ended Working Group of the Parties to the Montreal Protocol; OEWG46 – forty-sixth meeting of the Open-ended Working Group; PDF – portable document format; SDGs – Sustainable Development Goals; TEAP – Technology and Economic Assessment Panel; TOC – technical options committee; TSB – temporary subsidiary body.

Annex VI

Status of contributions as at 31 December 2023
